# LAS PIÑAS

A City with Heritage

Joyce M. Crisanto  
Visitacion "Chit" R. De la Torre

## INTRODUCTION

This book is actually two books in one. The first book covers the emergence of Las Piñas as a simple barrio two hundred years ago and growing up through the colonial years. The second book traces the transformation of Las Piñas from a small-time town into an urbane City with strong egalitarian and environmental leanings.

The two books combined provide a storehouse of information, a handy source book for reference, as well as a riveting tale of a place where unforgettable characters invest their energies, surprising even themselves, of what could be accomplished with the drive and tenacity of the Las Piñero.

## TABLE OF CONTENTS
